

Product Description

The SenseWear® display is a powerful and convenient way for wearers of the SenseWear® Pro Armband to get up to the minute feedback on a variety of important metabolic and energy related parameters.

Features:

Get up to the minute feedback of daily calorie, step and activity progress in a small, wearable display

Set personal targets and get feedback for achieving daily calorie, step and activity goals

Set the personal TRIP odometer to track daily workouts

View never before seen activity intensity (moderate and vigorous), calorie per minute and METS feedback in a continuous free-living monitor

Get the information you want when you want it through a simple and intuitive interface

Wear the most versatile display of its kind – on the wrist, pants, shirt, workbag – concealed or revealed - virtually anywhere on or near the body

Sync with multiple armbands of different subjects without a PC

Large digit display and backlight for easy, anywhere reading

User replaceable battery
